Please contact customer service at (877) 567-7872 for more information.

## Introducing Scheduled Events

---

Scheduled Event is the name for any setting you create that causes the system to remind you about a program or record a program automatically. There are three types of Scheduled Events: Reminders, Auto Tunes and Recordings.

A Reminder tells the system you want it to let you know a program is about to come on. An Auto Tune will automatically change to the correct channel

when the program is about to start. A Recording will automatically record the program using PVR.

**Note: Your set top box must support PVR to use the Record event.**

## Set A Reminder, Auto Tune or Recording

### Step 1: Pick A Program

Find the program you want to watch. Highlight the program listing and press **SELECT**.

**Note:** If you are setting a recording, you can highlight the program listing and press

## Step 4b: Your Auto Tune

Just before the program begins, a message will display, giving you the option to tune in or cancel. You can choose either option, or just wait, the pop up will go away, and the system will tune you to the correct channel.

## Step 4c: Your Recording

If you have set a recording, you don't need to do anything else.

Once your program begins, your set top box will begin recording it for you. When you are ready to watch your recording, you will need to go to the Vault. For more information on the Vault, see page 33.

## Set A Multi-Reminder, Multi-Auto Tune or Multi-Recording

## Introducing Rentals and VOD (Video on Demand)

Rentals provides access to VOD (Video on Demand) movies and programs. It's like renting from the local video rental store, only better. You can choose from the most recent movies and older favorites, along with favorite TV shows, music videos and local programming (depending on what Rural Telephone / Nex-Tech offers).

Unlike pay per view which only allows you to watch the program once at the scheduled time, VOD allows you to determine what and when you want to watch, and how often during the rental period. You can even pause, rewind or fast forward just like a videotape or DVD. Rental prices are comparable to prices at your local video store, and some programs may even be free!

VOD Rentals are the ultimate in convenience and entertainment in your home! No more hassles with video rental stores.

## Go To Rentals

# Movie Ratings

## MPAA (Motion Picture Association of America) Ratings System

### G – General Audience

This is a film which contains nothing which would, in the view of the MPAA Rating Board, be offensive to parents whose younger children view the film.

### PG – Parental Guidance Suggested

The theme of a PG-rated film may itself call for parental guidance. There may be some profanity in these films. There may be some violence or brief nudity. But these elements are not deemed so intense as to require that parents be strongly cautioned beyond the suggestion of parental guidance. There is no drug use content in a PG-rated film.

### PG-13 – Parents Strongly Cautioned

A PG-13 film is one which, in the view of the MPAA Rating Board, leaps beyond the boundaries of the PG rating in theme, violence, nudity, sensuality, language, or other contents, but does not quite fit within the restricted R category. Any drug use content will initially require at least a PG-13 rating.

### R – Restricted

An R-rated film may include hard language, or tough violence, or nudity within sensual scenes, or drug abuse or other elements, or a combination of some of the above, so that parents are counseled to take this advisory rating very seriously.

### NC-17 – No Children 17 or Under

NC-17 does not necessarily mean “obscene or pornographic” in the often accepted or legal meaning of those words. The MPAA Review Board does not and cannot mark films with those words. These are legal terms and for courts to decide. The reasons for the application of an NC-17 rating can be violence or sex or aberrational behavior or drug abuse or any other elements which, when present, most parents would consider too strong and therefore off-limits for viewing by their children.

### AO – Adults Only (Game Rating)

Contains content unsuitable for minors.

For more information on the MPAA or the MPAA ratings system, please visit [www.mpa.org/filmrat\\_ratings.asp](http://www.mpa.org/filmrat_ratings.asp).

## TV Parental Guidelines Ratings System

### Program Ratings

#### TV-Y – All Children

This program is designed to be appropriate for all children.

#### TV-Y7 – Directed to Older Children

This program is designed for children age 7 and above. It may include mild fantasy violence or comedic violence.

#### TV-G – General Audience

Most parents would find this program suitable for all ages.

#### TV-PG – Parental Guidance Suggested

This program contains material that parents may find unsuitable for younger children.

#### TV-14 – Parents Strongly Cautioned

This program contains some material that many parents would find unsuitable for children under 14 years of age.

#### TV-MA – TV Mature Audience Only

This program is specifically designed to be viewed by adults and therefore may be unsuitable for children under 17.

### Content Ratings

Content Ratings are shown just below the program rating.
